Something round

Something that lives in sand

Something grey

Something smooth

Something flat

Something rough

Something larger than your palm

Something brown

Something smaller than your fingertip

Something white

An animal that lives near the water

Shoreline Activities

- Use stones of various sizes to create a stack. Try using a combination of different size stones near the bottom. Can you create a pattern in your stack?
- Help protect the animals and environment by picking up some trash. Be careful and have an adult help you. Do not pick up broken glass or other sharp objects.
- Bring art supplies and draw or paint what you see near the water.
- Take photos of plants or animals you see. Then look them up in a guide book to help you identify them.
- Write a message in the sand using a stick, your finger, or spelled out with found natural object.
- Count the number of people or animals you see from one spot.
- Hold up your hands using your pointer fingers and thumbs to "frame" your view. Look through this frame to focus on something.
